DETAILED ACTION

1. This Office Action is responsive to the Amendment filed on 04/05/2004.

Double Patenting

2. Claims 5 and 11, 13, 15, 17, and 18 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of copending Application No. 09/609,651 (Lin et al.). Although the conflicting claims are not identical, they are not patentably distinct from each other because the only differences between claims in the two applications are scanning interface and connector. In claims of instant application No. 09/610012 discloses first and second scanning interfaces. In claims of copending application No. 09/609,651 discloses a scanning interface. It would have been obvious to a person having ordinary skill in the art at the time the invention was made to make separately one scanning interface become first and second scanning interfaces. In claims of instant application No. 09/610012 discloses a connector (126). In claims of copending application No. 09/609,651 discloses first and second connector (CN1) and (CN2). It would have been obvious to a person having ordinary skill in the art at the time the invention was made to make integrally first connector (CN1) and second connector (CN2) become a connector (126) to reduce the cost of the whole system.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

This Double Patenting rejection will be withdrawn when Applicant files a Terminal Disclaimer.
